

Use Case ID : 4

Use Case Description: Edit User Information

Title: Edit User Information

Actors:

- Primary Actor: User
- Secondary Actor: User API, Database

Preconditions:

- The user must be logged into the system.

Postconditions:

- Success: The user's information is successfully updated and displayed.
- Failure: The update process fails, an error message will be displayed to the user.

Primary Path:

1. The user navigates to the profile page.
2. The user presses the edit icon in order to unlock the user fields.
3. The user edits the user information.
4. The user sends the updated information to User API.
5. The User API updates the user information.
6. The User API returns the user's new information.
7. The system displays a success message.

Exceptional Paths:

- System Error: If there is a system error during the update process, the system displays an error message.
