Use Case ID : 5

Use Case Description: Load Patient History

Title: Load Patient History

Actors:
- Primary Actor: User (Doctor)
- Secondary Actor: History API, Database

Preconditions:
- The doctor must be logged into the system.

Postconditions:
- Success: The patient's information is successfully loaded and displayed.
- Failure: The loading process fails, an error will be displayed to the user.

Primary Path:
1. The doctor navigates to the doctor page.
2. The loading of the page will trigger the loading of the patient's information and their history.
3. The History API processes the request.
4. The History API returns the patient's information.
5. The system displays the patient's information.

Exceptional Paths:
- System Error: If there is a system error during the loading process, the system displays an error message.
